

PRUNING TOOLS

Working with plants means working with living things and the users of pruning tools therefore need to be especially careful and respectful of nature. They need perfect cuts as high-quality results and increased productivity are both important. Bahco has developed tools that reduce fatigue and prevent injuries, while providing precise, durable and reliable performance, every time.

Combining functional design, modern aesthetics and decades of experience on five continents, Bahco has developed a range of tools designed to satisfy the specific needs of professionals in numerous, highly demanding pruning applications.

Bahco pruning tools are available in three ranges: Professional, Expert and Tradition.

A close-up photograph of a hand holding a pair of pruning shears, cutting through a branch of a plant with green and some brown leaves. The shears have a silver blade and a black handle with an orange accent. The background is a soft-focus view of more foliage.

PRUNING TOOLS

An extensive range of pruning tools to satisfy the demands of professional users and discerning gardeners.

<p>PROFESSIONAL</p> <ul style="list-style-type: none">▪ High-quality pruning and cutting tools aimed at professional users within each different area of application▪ Developed with the latest materials and technologies for efficient, comfortable and attractive tools▪ Spare parts available for all tools	
<p>EXPERT</p> <ul style="list-style-type: none">▪ Assortment of gardening tools for the quality conscious discerning private consumer▪ No spare parts available	
<p>TRADITION</p> <ul style="list-style-type: none">▪ Assortment of functionally-designed pruning and cutting tools for professional users and gardeners▪ Spare parts are available for selected tools	

ICON INDEX - AREAS OF APPLICATION

To help you select the right tools for the job, the range has been organized into:

				
VITICULTURE	POMOLOGY	LANDSCAPE	FORESTRY	GARDEN
				

BLADE TECHNOLOGY

BYPASS: For cutting live and green wood

Bypass secateurs and loppers are used for cuts on living plants, where the impact of the cut has to be as small as possible.

The bypass cutting head owes its name to the fact that the cutting blade 'passes-by' the counterblade in a scissor action.

Bahco bypass secateurs slice through the wood requiring less force than a straight cut, causing less compression damage to the wood.

ANVIL: For cutting mature and dry wood

Anvil secateurs and loppers are used where cleanliness of cut is not as important.

The blade of the cutting head is narrower and sharper than that of the bypass.

When cutting mature and dry wood, the blade needs to be forced through the wood with greater pressure. The 'anvil' supports the branch and spreads the pressure to reduce damage.

BYPASS

ANVIL

BLADE TECHNOLOGY

THE GRINDING EDGE

Four separate grinding operations are performed (Drawing A)

1. Main bevel, the cutting area of the blade is tapered to a point
2. Cavity, a shallow hollow is ground into the inner face of the blade
3. Second bevel, the edge is polished to a razor sharp point
4. Back bevel, an additional honing angle is ground on the inside edge

Reduced friction and sticking (Drawing B)

- Due to the hollow inner face, the blade only touches the counterblade at the point of cutting. This reduces friction and the risk of sticking, and increases performance

SLICING CUT

How it works

- The sharp upward curve of the blade causes the leading edge to 'slice' as it cuts into the wood
- The off-centered pivot bolt doubles this slicing motion increasing the length of the blade used for cutting

Why it works

Imagine cutting a loaf of bread. No matter how sharp your blade, if you attempt to cut without slicing, the bread is compressed and becomes harder to cut, requiring more pressure, damaging the loaf.

Cutting live wood is similar – it can also be cut more efficiently if a slicing motion is added to the downward pressure.

Results

- Less cutting force required
- Clean cut without damaging the plants
- Less wear and longer blade life
- Fewer broken blades

EVOLVING BEVEL

The evolving bevel technology is the latest improvement of the slicing cut. The unique grinding profile of the blade reinforces the slicing motion and helps it penetrate the wood, especially at the beginning of the cut. This gives the user a

feeling of ease, quickness and efficiency during pruning.

- The evolving bevel technology is exclusive to Bahco and implemented in the P116-SL lopper range

ERGONOMIC SECATEUR

PROFESSIONAL

COMFORT

The design of the ERGO™ secateur is the result of five years of scientific research and hundreds of user tests all over the world to help us understand how repetitive, intense movements affect the

SECURITY

HEALTH

human body. The design of the ERGO™ secateurs mean less fatigue at the end of the day and less painful, more productive work.

EFFICIENCY

What makes the PX and PXR ergonomic?

FEATURES

- Vertical and lateral inclinations
- Shape of the handles
- Elastomer coating on upper handles
- Choice of cutting head
- Choice of spring
- Hand measuring system

BENEFITS

- Keeps the wrist in a neutral position
- Provides comfort
- Helps to spread pressure evenly
- Provides the right cutting head for each job
- Adapts the secateur to the power of the hand
- Guides to find the best secateur

Vertical inclination

Compared to a traditional secateur, the downward inclination of the PX and PXR ERGO™ secateurs compensates the wrist bending and allows the hand to remain in a neutral position, significantly reducing the risk of Carpal Tunnel Syndrome.

Lateral inclination

Compared to a traditional secateur, the inclination to the left (for right-handed secateurs) of the PX and PXR ERGO™ secateurs compensates for the bending of the wrist, and allows the hand to remain in a neutral position, improving pressure capacity to be applied on handles and prevents MSDs (musculoskeletal disorders).

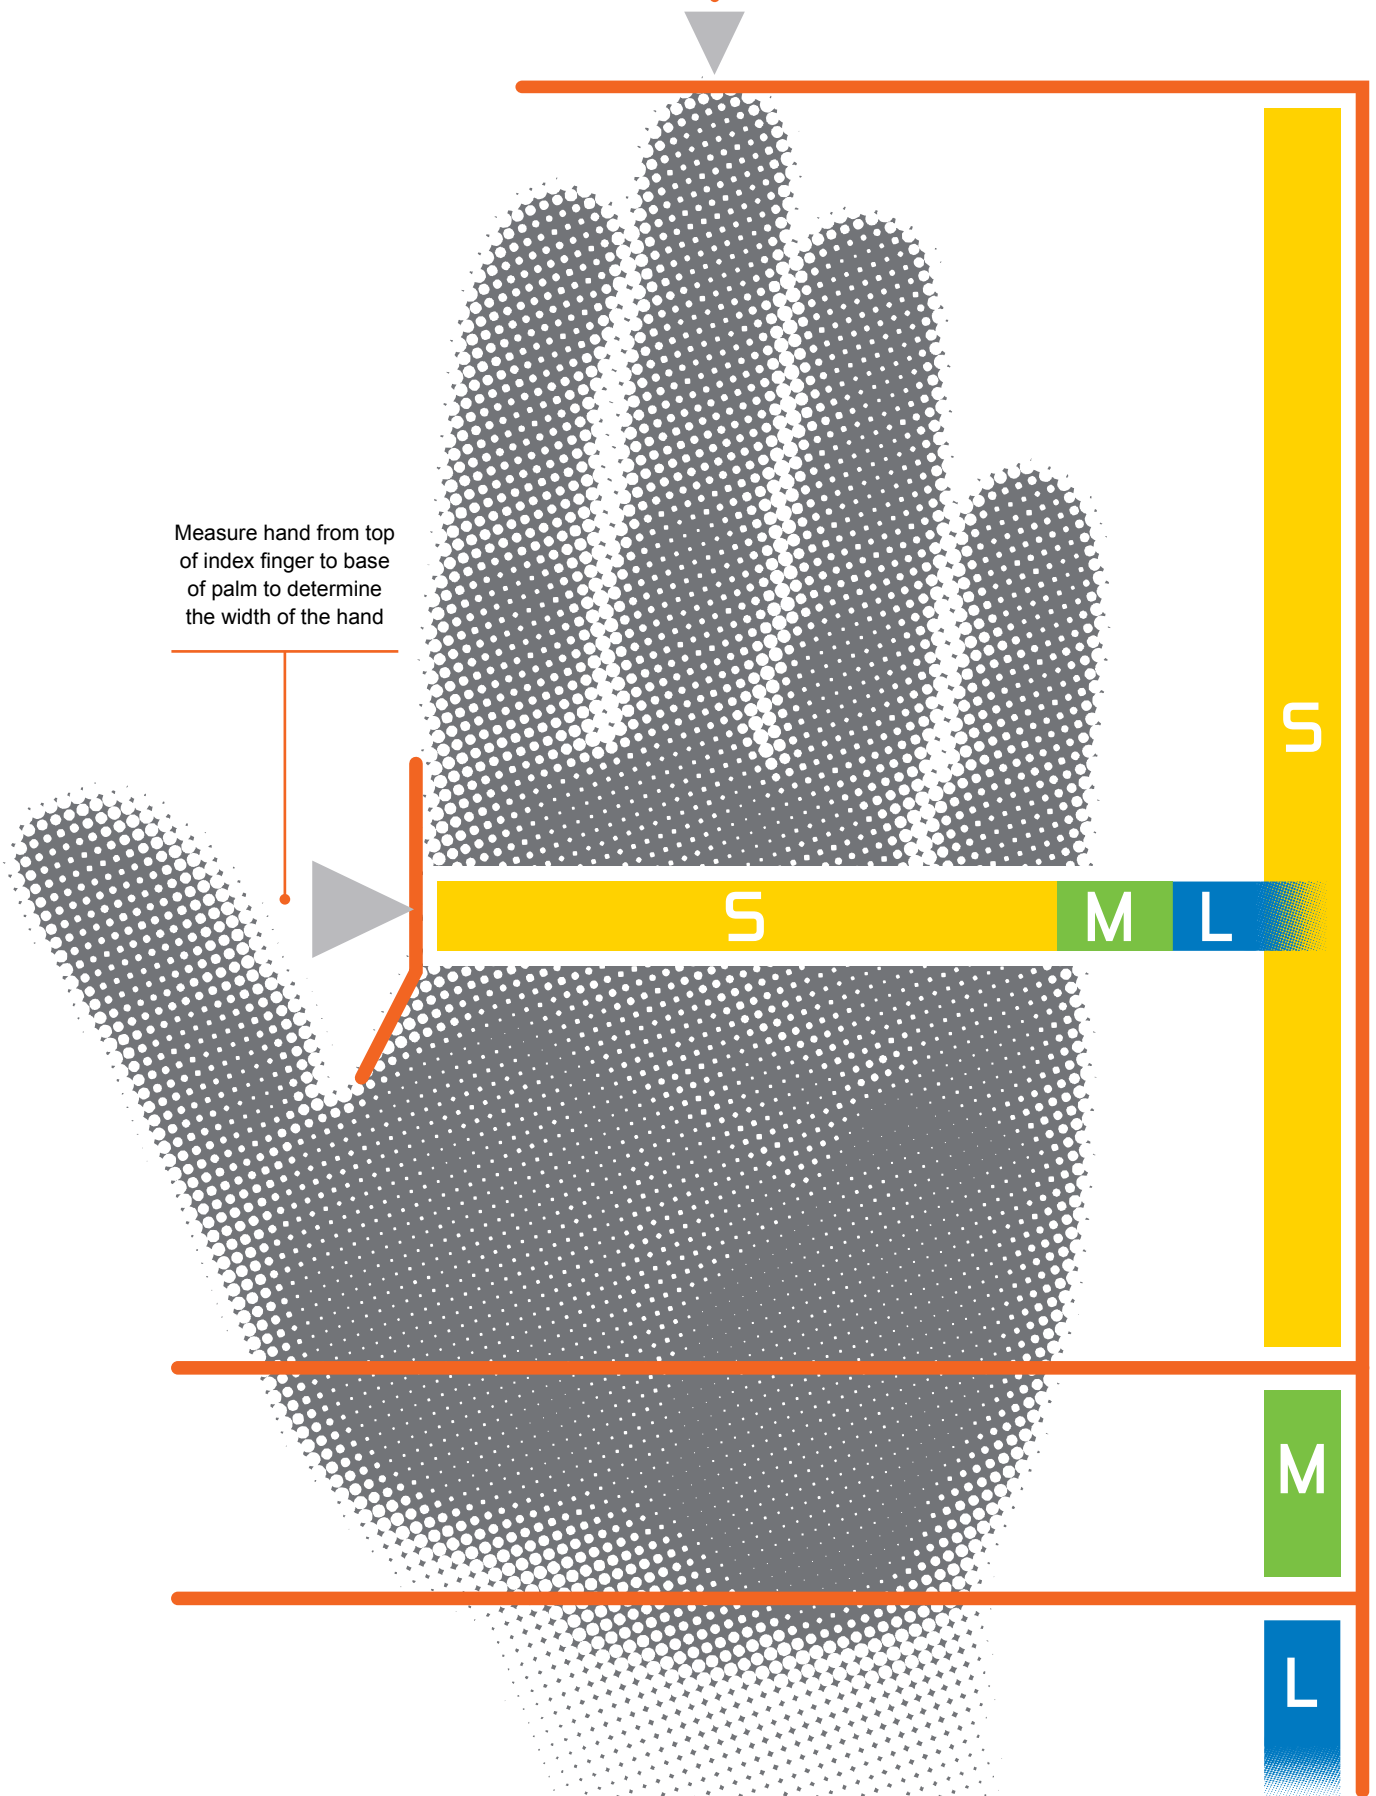

HAND-MEASURING GUIDE FOR PX AND PXR ERGO™ SECATEURS

Measure finger-tip to wrist to determine the length of the hand

Measure hand from top of index finger to base of palm to determine the width of the hand

ERGONOMIC CONCEPT

PX TYPE

Fixed handle ergonomic secateur

Ergonomic design within a modular system, enabling the user to build a secateur that fits the hand perfectly.

PXR TYPE

Rotating handle ergonomic secateur

Same head and palm handle as the PX, but with a comfortable, elastomer-coated, rotating handle. PXR cuts with optimal accuracy and ease.

100% MODULARITY. All spare parts available.

RIGHT-HANDED HANDLES

CUTTING HEAD SIZES

PX-S
Fixed handle
Small size

N° 1 Small cutting head
(Cut. cap. 15 mm - 5/8")

Ø 15 mm (5/8")

Ideal for end of season, clearing of vines from training wires and green pruning.

ERGO™ tip: Highly recommended for users who are already suffering from aches and pains in their hand or arm.

PX-M
Fixed handle
Medium size

N° 2 Medium cutting head
(Cut. cap. 20 mm - 3/4")

Ø 20 mm (3/4")

Ideal for most popular training methods in vineyards of up to 10 years of age.

ERGO™ tip: Recommended for users who do not feel any pain yet, but who wish to avoid it.

PX-L
Fixed handle
Large size

PXR-S
Rotating handle
Small size

N° 3 Large cutting head
(Cut. cap. 30 mm - 1 1/4")

Ø 30 mm (1 1/4")

Ideal for most popular training methods in vineyards of up to 10 years old.

ERGO™ tip: Not recommended for users who already suffer from pains in the hand or arm. It is then advisable to use a lopper or a pruning saw.

PXR-M
Rotating handle
Medium size

LEFT-HANDED HANDLES

CUTTING HEAD SIZE

PX-M2-L
Fixed handle
Medium size

N° 2 Medium cutting head
(Cut. cap. 20 mm - 3/4")

Ø 20 mm (3/4")

PXR-M2-L
Rotating handle
Medium size

HARVESTING SNIPS

FOUR DIFFERENT CUTTING HEADS

The handy and lightweight Bahco Harvesting Snips meet the needs of different end-users. They have comfortable handles reinforced with fibreglass - all snips are supplied with a lightweight plastic holster and are available in different box quantities.

P123

Long and slim bypass cutting head.

P127

Short blades, rounded at the tips for safety, with limited opening.

P128

Long, slim and straight blades. Wide opening.

P129

Same blades as P128 but bent at an 11° angle to give better access to hidden stems.

LOPPERS

SUPER
LIGHT

Lightweight, super-strong aluminium for more strength and comfort, with less fatigue.

DIFFERENT CUTTING HEADS FOR DIFFERENT APPLICATIONS

P114 STYLE

- Narrow cutting head for pruning in confined spaces
- Main areas of application:
 - Viticulture
 - Pomology with hedge-like cultivation (apple, pear)

P116 STYLE

(P116, P19, P16)

- Strongly curved large blade with a deep-hooked counterblade
- Designed for pruning below waist height and near the ground
- Main areas of application:
 - Viticulture
 - Pomology; including soft fruits
 - Landscaping (P19)

The evolving bevel technology is utilized on the P116-SL loppers and reinforces the slicing motion of the blade - an advantage when cutting thick branches.

P160 STYLE

- Narrow blade combined with deep-hooked, thin counter blade
- Well-balanced loppers designed for pruning above shoulder height
- Main areas of application:
 - Pomology
 - Landscaping

P172 STYLE

- Strong blade with anti-friction coating (Xylan®), interchangeable anvil
- Lever-action to facilitate the pruning of mature and dry wood
- Main areas of application:
 - Landscaping
 - Occasionally also used in pomology

HEDGE SHEARS

SUPER 
LIGHT

Lightweight, super-strong aluminium for more strength and comfort with less fatigue.

THREE MAIN TYPES OF SHEAR BLADES

- Large blades with partly serrated edges for hedge trimming on plants with thicker twigs
- Main area of application:
 - Landscape

- Narrow blades with smooth edges for trimming leaves and soft shoots, very clean cut
- Main areas of application:
 - Landscape: topiary
 - Viticulture: leaf pruning

- Wavy blades with smooth edges for pruning hedges and shrubs with a fairly open structure and soft shoots. The waves trap groups of twigs and prevent them from sliding out of the blade
- Main area of application:
 - Landscape

PRUNING SAWS

SAW TEETH PERFORM THREE FUNCTIONS

CUTTING

Teeth tips act like small knives that cut through the wood fibres. Only 0,2 mm (0.008 inch) of a tooth is used for this function, which is done by the sharp ground tip.

SEPARATING

Teeth edges are chisels that shave wood from between the cuts.

CLEARING

Gullets collect saw dust to deposit it outside the kerf. For this an open and smooth ground surface is needed in the gullet.

TOOTH DESIGN

HARDPOINT

Teeth are heat-treated after grinding. Hardened teeth remain sharp four times longer but cannot be re-sharpened with a file.

FILEABLE

Teeth can be re-sharpened with Bahco file 4-272.

JS-TOOTH

45° cutting angle, wide gullets for removal of wood chips, taper ground blade with non-set tooth design for very fast and aggressive cutting.

JT-TOOTH

45° cutting angle, triple-grinding, long teeth with narrow gullets, non-set but taper ground blade.

XT-TOOTH

Triangular shape, every third tooth is cut off and set to help with the removal of wood chips from the kerf.

STANDARD TOOTH

Triangular shape, all teeth are set, with hardpoints or re-fileable.

PROFESSIONAL

JS BLADES

Very aggressive toothing for an extremely fast and easy cut for green wood and thick branches.

JT BLADES

For clean, fast pruning of live and green wood. Ideal for winter pruning.

XT BLADES

For pruning all varieties of mature and dry wood.

TRADITION

PX

ergo®

PROFESSIONAL ERGO™ SECATEURS

- Secateurs developed according to the scientific ERGO™ process
- Shape and size of handles adapted to the size of the hand
- Size of the cutting head adapted to the task to be performed
- Vertical and lateral inclinations of cutting head allow pruning with a straight wrist
- Reduces fatigue and pains and increases comfort and performance
- PX handles made of composite material with soft rubber on upper part
- Available in three sizes: S (small), M (medium) and L (large)
- Three sizes of cutting heads with different cutting capacities available:
1 (15 mm, 1/2"), 2 (20 mm, 3/4") and 3 (30 mm, 1 1/4")
- All cutting heads fit all handles
- PX-M2-L left-handed version

	 731151				 mm	 g

9210

PROFESSIONAL PNEUMATIC SECATEUR

- Powerful but light tool
- Designed for pruning all kinds of fruit trees and for landscaping work
- Body made of acetatic resin (POM)
- Single piston with a spring return
- Cutting head with excellent slicing cut
- Centre bolt locking system
- Special ice-free valve protects the tool against condensation water freezing inside the tool in cold weather
- Connecting thread requires a 1/4" male coupler for the air hose

P51-SL

PROFESSIONAL HEDGE SHEARS

- High-quality shears for professional use in parks, topiary gardens and nurseries
- Fully hardened blades
- Partly serrated edge for cutting up to 10 mm (1/2") thick branches
- Lightweight aluminium handles with smooth plastic grips
- Reduced fatigue through superior cutting performance and very comfortable handling

P51-SL	731151 8301217	2	570	990

P51H-SL

PROFESSIONAL HEDGE SHEARS

- High-quality shears for professional use in parks, topiary gardens and nurseries
- Fully hardened blades
- Partly serrated edge for cutting up to 10 mm (1/2") thick branches
- Extra long, lightweight aluminium handles for a good reach
- Reduced fatigue through superior cutting performance and very comfortable handling

P51H-SL	731151 8301224	2	730	1076

P54-SL

PROFESSIONAL HEDGE SHEARS

- High quality shears with short handles (26 cm) for professional use in parks, nurseries and vineyards
- Compact design and angled form, ideal for topiary and leaf pruning
- Slim, straight blades, available in 20 and 25 cm, giving a clean cut especially important when clipping topiary
- Lightweight aluminium handles with comfortable plastic grip and soft buffers reduce fatigue

P54-SL-20	731151 8301248	2	500	742
P54-SL-25	8301231	2	550	813

GS-180

EXPERT GRASS SHEARS

- Single handed grass shear with stainless steel blades carefully set for self-grinding during use
- Rotating head (90° left & right) for lawn edging
- Swivels easily into different positions to facilitate the cut in certain slopes
- Soft touch and non-slip grip on upper handle for maximum comfort
- Lower handle loop for finger protection
- No spare parts available

GS-180-F	731151 8275488	6	375 mm	317 g

GS-76

TRADITION GRASS SHEARS

- Grass shear with hardened blades, carefully set for self-grinding during use to ensure a good cutting edge
- Precise spring mechanism ensures that the blades are kept aligned in use on grass
- Lever mechanism designed for minimum effort in operating the shears
- Three different cutting head positions to gain access to difficult-to-reach corners and edges which need trimming
- Blades are solely made to cut grass
- No spare parts available

GS-76	731151 8010782	6	355 mm	435 g

P74

TRADITION GRASS SHEARS

- Lawn shear for cutting in difficult-to-reach places where lawn mowers cannot gain access
- Suitable for cutting in shrubs, borders, around trees etc.
- 90 cm long handles of round steel tubes, fitted with black plastic covers
- Cutting head with horizontal oriented blades, also known as duck's foot
- Stamped, fully hardened, double bevelled blade with black Xylan® coating, straight cutting edge, length 20 cm
- Stamped, flat-edged, fully hardened counter blade, black Xylan® coating
- Plastic buffer to reduce jarring

FS-5

EXPERT SCISSORS

- Floral scissors ideal for pruning delicate plants
- For deadheading and clearing out of dry leaves, for pruning and harvesting herbs and for creating floral decoration
- Short pointed blades made of stainless steel, with micro serration for cutting soft stems of small diameter
- Finger loops with soft touch material

FS-5	731151 8266455	10	125	24

FS-8

EXPERT SCISSORS

- Floral scissors designed for cutting soft stems of small diameter, ribbons, any kind of paper, thin cardboard and tissues used in floral decoration
- Also useful for pruning indoor plants, for deadheading in difficult to reach places
- Long straight blades made of stainless steel with micro serration
- Finger loops with soft touch material

FS-8	731151 8266462	10	165	47

FS-7.5

EXPERT SCISSORS

- Floral scissors with large finger loops
- Compact strong blades with serration, designed for all kinds of flower stems and twigs as well as ribbons, cardboard and even soft wire
- Could also be used for pruning small shrubs on the balcony and indoor plants
- Finger loops with soft touch material

FS-7.5	731151 8266479	10	200	108

PRUNING SAWS

51 -JS

-JS RANGE

- Sword saw especially designed for landscaping
- JS toothing developed for pruning living wood
- Extremely sharp and very aggressive toothing for fastest cut
- Non-set teeth with hardpoint, taper ground blade for perfect clean finish
- Comfortable, non-fatigue 2-component handle
- Available in two different lengths, both equipped with holster
- Replacement blades available

5124-JS-H	731151	4	240	5	280
5128-JS-H	8219369	4	280	5	300

396-JS

-JS RANGE

- Foldable pruning saw with JS toothing designed for fruit growing, wine growing and landscaping
- Blade with hardpoint teeth and extra wide gullet for faster cutting in thicker green branches
- Strong 2-component plastic handle with comfortable grip
- Safety lock both in opened and closed position
- Replacement blade available

396-JS	731151	4	190	7 1/2	5	200

41 -JT

-JS RANGE

- Sword saw especially designed for wine and fruit growing
- JT blade with aggressive teeth designed for winter pruning
- Non-set teeth, refilable, for a smooth cutting surface
- Comfortable, non-fatigue 2-component handle
- Available in two different lengths, both equipped with holster
- Replacement blades available

4124-JT-H	731151	4	240	7	340
4128-JT-H	8267810	4	280	7	356

396-JT

-JS RANGE

- Foldable pruning saw designed for occasional use in vineyards and orchards
- JT toothing for pruning living wood in winter with a fast and clean cut
- Strong 2-component plastic handle with comfortable grip
- Safety lock in both open and closed position
- Replacement blade available

396-JT	731151	4	190	7 1/2	7	200

396-HP

-JS RANGE

- Foldable pruning saw with special patented XT7 toothing for a fast cut in hard or dry wood
- Multipurpose saw with hardpoint teeth, performing well in living wood
- Strong 2-component plastic handle with comfortable grip
- Safety lock both in opened and closed position
- Replacement blade available

396-HP	731151	4	190	7 1/2	7	200

349

EXPERT PRUNING SAWS

- Pruning saw for home owners
- For pruning ornamental shrubs and fruit trees in the garden
- Anti-friction coating for rust protection and easy cut
- Toothing designed for aggressive cut on pullstroke

349	731151	4	300	7	225

PG-72

EXPERT PRUNING SAWS

- Folding saw for home owners
- For occasional pruning when a secateur or a lopper is not sufficient
- Anti-friction coating for fast cut in hard and dry wood

LS-COMBINESS

GRINDING STONES AND CARBIDE SHARPENER

- Synthetic 2-component grinding stone for small blades
- Has to be moistened with petrol or oil for full efficiency
- Quick removal of damaged metal surfaces with 180 grain/cm² (green side of stone)
- Smooth finish with 400 grain/cm² (grey side)

LS-COMBINESS	8041366	1	100	75

LS-NATURAL

GRINDING STONES AND CARBIDE SHARPENER

- High quality natural grinding stone, grain size 600
- For finishing edges of pruning tools
- This stone has to be used in a wet state in order to sharpen more efficiently
- Especially recommended for small blades requiring to be sharpened precisely

LS-NATURAL	8224622	1	70	40

LS-TRIANGLE

GRINDING STONES AND CARBIDE SHARPENER

- Synthetic grinding stone, grain size 220
- To sharpen blades with high precision
- Stone can either be moistened with petrol, oil or water

LS-TRIANGLE	8224653	1	100	50

LS-CORINDON

GRINDING STONES AND CARBIDE SHARPENER

- Synthetic grinding stone with 320 grain/cm² for professional use to sharpen high performance blades
- For rather small blades like on secateurs
- Very high removal rate
- Stone has to be moistened with petrol or oil for full efficiency

LS-PIERRE CORINDON	8009977	1	100	50

ACCESSORIES & MAINTENANCE

SHARP-X

GRINDING STONES AND CARBIDE SHARPENER

- Professional tungsten-carbide sharpener to re-sharpen all kind of blades
- 2-component handle for comfortable use
- Very secure with two side protections to avoid fingers slipping down to the cutting edge of the blade
- Two carbide edges for easy and long-lasting use

SHARP-X	731151 8264895	10	100 mm	25
SHARP-X-DISP	8264901	1	100	25

LS-PIERRE-FAUX

GRINDING STONES AND CARBIDE SHARPENER

- Synthetic grinding stone, grain size 180
- To sharpen long blades for tough work such as long-shafted tools, scythes and axes
- Stone has to be moist with petrol or oil for full efficiency

LS-PIERRE-FAUX	731151 8009038	1	230 mm	210

LS-6160-23

GRINDING STONES AND CARBIDE SHARPENER

- Synthetic grinding stone, "Carbor" type, grain size 220
- Produces very fine surfaces on cutting tools
- Can be used wet or dry but it's not recommended for finishing work on small or new blades

LS-6160-23	731151 8041304	1	230 mm	170

LS-6060-23

GRINDING STONES AND CARBIDE SHARPENER

- High quality natural grinding stone, "Lombarde" type
- For finishing edges of all types of cutting tools
- Stone has to be moist with petrol or oil for full efficiency

LS-6060-23	731151 8041311	1	230 mm	300

SAP-X

CLEANERS AND LUBRICANT

- Cleaning liquid for pruning blades
- Removes dirt and stains and is a corrosion inhibitor
- Advice:
 - Spray on the surface of the blade
 - Leave to react for a few seconds
 - Wipe clean and lubricate

SAP-X	731151 8225728	6	75

RESIN-X

CLEANERS AND LUBRICANT

- Very efficient resin dissolvent
- Designed for quick removal of resins and natural adhesives
- Particularly useful for maintenance of blades
- Tensio-active, cationic, non ionic and contains a corrosion inhibitor
- Advice: Spray on the surface to be cleaned
- Let react for a few seconds
- Wipe clean and lubricate

RESIN-X	731151 8222215	6	75

ECO-LUBE

CLEANERS AND LUBRICANT

- Synthetic lubricant for secateurs
- To keep tools in good shape reducing parts friction and allowing a smoother cutting action
- To be applied to bolts and junctures

ECO-LUBE100	731151 8249434	4	128

PROF-H

HOLSTERS

- Strong and natural-coloured leather holster for secateurs
- Two belt slits to fit any belt up to 50 mm width. Top-quality leather, studded and stitched. Steel belt clip feature

PROF-H	731151 8158439	2	86

ACCESSORIES & MAINTENANCE

PROF-K

HOLSTERS

- Strong leather holster for small grinding stones or knives, with belt loop on the back
- Top quality leather, studded and stitched

PROF-K	731151 8218256	1	42

PROF-PH

HOLSTERS

- Top quality plastic holster, which holds the secateur very securely

PROF-PH	731151 8243548	2	100

PROF-LOPP

HOLSTERS

- Practical lopper holster primarily for pruning in vineyards
- Additional pocket to carry a sharpening stone, grafting knife or a SHARP-X
- Holster can be strapped to the lower part of the leg or on a belt
- Made of wear-resistant and lightweight nylon material for durability and comfort
- Holster suitable for P16,P14,P-SL2 & P-SL loppers up to 60 cm length

PROF-LOPP	731151 8288549	1	375

PROF-SEC

HOLSTERS

- Practical secateur holster
- Wear-resistant and lightweight nylon material for durability and comfort
- Additional pocket for grinding stone or grafting knife.
Belt loop. (fits 4750-QRLB-1 & 4750-HDB-1)

PROF-SEC	731151 8288532	1	150
